

AiboCore::MainSetup

```
graph LR; AiboCoreMainSetup[AiboCore::MainSetup] --> devGetHeight[dev::getHeight]; AiboCoreMainSetup --> devGetWidth[dev::getWidth]; AiboCoreMainSetup --> devInitialize[dev::initialize]; AiboCoreMainSetup --> AiboCamUpdateMMap[AiboCam::updateMMap];
```

The diagram illustrates the relationships between the `AiboCore::MainSetup` class and four other components. The `AiboCore::MainSetup` class is represented by a grey rectangular box on the left. Four blue arrows originate from its right side and point to four white rectangular boxes on the right. These boxes represent the methods `dev::getHeight`, `dev::getWidth`, `dev::initialize`, and `AiboCam::updateMMap`, which are called by `AiboCore::MainSetup`.

dev::getHeight

dev::getWidth

dev::initialize

AiboCam::updateMMap
